

Mehtab.

SENIOR BACKEND / FULL STACK DEVELOPER

Backend-focused software engineer specializing in secure, scalable systems. Experienced in designing high-performance APIs, authentication flows, and database architectures for modern web platforms. Known for precision, system-level thinking, and long-term maintainability.

Experience

Senior Developer

2025 — Present

Bangopure Limited

Designing and implementing secure backend systems for startups and growing platforms, with a strong focus on performance, scalability, and data integrity.

- Architected scalable APIs using Node.js (Hapi.js) supporting high concurrency
- Designed PostgreSQL and RethinkDB schemas optimized for performance
- Implemented secure authentication systems (JWT, CSRF, email verification)
- Improved response times and reduced infrastructure costs through optimization

Full Stack Developer

2022 — 2025

Freelance / Contract

Modernized legacy systems and delivered full-stack features with emphasis on reliability, security, and clean architecture.

- Migrated legacy applications to modern backend and frontend stacks
- Built centralized authentication systems used across multiple products
- Improved stability, maintainability, and developer experience

Education

Associate Degree in Arts (ADA)

2023

University of the Punjab

Currently pursuing an Associate Degree with continued focus on analytical thinking, communication, and academic foundations that complement technical software development work.

Intermediate in Computer Science (ICS)

2021

BISE Lahore

Studied computer science fundamentals including programming concepts, logical problem-solving, and core computing principles.

Matriculation in Biological Science

2019

BISE Lahore

Completed secondary education with a strong academic base, building discipline and structured learning habits later applied to technical studies.

Core Skills

BACKEND

Node.js, Hapi.js, Express, REST APIs, WebSockets

DATABASES

PostgreSQL, RethinkDB, Redis, schema design, optimization

SECURITY

JWT, CSRF, XSS protection, secure authentication flows

DEVOPS

Docker, Linux servers, CI/CD basics, deployment workflows

FRONTEND

React, Tailwind CSS, responsive UI, performance tuning

ENGINEERING MINDSET

Scalability-first design, clean architecture, system thinking
